

- 
- A scatter plot with a white background and a black border. The plot contains several data points categorized into three groups: 'Normal' (green), 'Low' (yellow), and 'Medium' (red). The points are distributed across the plot area, with a concentration of 'Normal' and 'Low' points in the upper right and 'Medium' points in the lower left. A legend in the bottom left corner identifies the categories by color and shape: green circles for 'Normal', yellow triangles for 'Low', and red squares for 'Medium'. The plot also includes several points that are not in the legend, such as green triangles, yellow squares, and red circles, suggesting a more complex classification or a different set of data.
- Normal
